Validation List no. 89

Validation of publication of new names and new combinations previously effectively published outside the IJSEM

The purpose of this announcement is to effect the valid publication of the following new names and new combinations under the procedure described previously [Int J Syst Bacteriol 27(3), iv (1977)]. Authors and other individuals wishing to have new names and/or combinations included in future lists should send the pertinent reprint or a photocopy thereof to the IJSEM Editorial Office for confirmation that all of the other requirements for valid publication have been met. It should be noted that the date of valid publication of these new names and combinations is the date of publication of this list, not the date of the original publication of the names and combinations. The authors of the new names and combinations are as given below, and these authors' names will be included in the author index of the present issue and in the volume author index. Inclusion of a name on these lists validates the name and thereby makes it available in bacteriological nomenclature. The inclusion of a name on this list is not to be construed as taxonomic acceptance of the taxon to which the name is applied. Indeed, some of these names may, in time, be shown to be synonyms, or the organisms may be transferred to another genus, thus necessitating the creation of a new combination.

Name	Proposed as:	Author(s) (reference)	Priority*	Nomenclatural type†
Actinokineospora auranticolor	sp. nov.	Otoguro et al. (5)	2	Strain YU 961-1 (=IFO 16518=DSM 44650)
Actinokineospora enzanensis	sp. nov.	Otoguro et al. (5)	2	Strain YU 924-101 (=IFO 16517=DSM 44649)
Actinomyces cardiffensis	sp. nov.	Hall et al. (4)	3	Strain R10394 (=CCUG 44997=CIP 107323)
Albidovulum	gen. nov.	Albuquerque et al. (1)	5	Albidovulum inexpectatum
Albidovulum inexpectatum	sp. nov.	Albuquerque et al. (1)	5	Strain FRR-10 (=DSM 12048=ATCC BAA-388)
Burkholderia hospita	sp. nov.	Goris et al. (3)	4	LMG 20598 (=CCUG 43658)
Burkholderia terricola	sp. nov.	Goris et al. (3)	4	LMG 20594 (=CCUG 44527)
Hydrogenothermaceae	fam. nov.	Eder and Huber (2)	1	Hydrogenothermus
Staphylococcus succinus subsp. casei	subsp. nov.	Place et al. (6)	4	Strain SB72 (=DSM 15096=CIP 107658‡)
Staphylococcus succinus subsp. succinus	Rule 40d§			
Thermodiscus	gen. nov.	Stetter (7)	6	Thermodiscus maritimus
Thermodiscus maritimus	sp. nov.	Stetter (7)	6	Strain S2 (=DSM 15173=JCM 11597)

For references to Validation Lists 1–71, see *Int J Syst Bacteriol* **49** (1999) 1325. Lists 72–88 were published in *Int J Syst Evol Microbiol* **50** (2000) 3, 423, 949, 1415, 1699, 1953; **51** (2001) 1, 263, 793, 1229, 1619, 1945; and **52** (2002) 3, 685, 1075, 1437, 1915.

§According to Rule 40d (formerly Rule 46) of the International Code of Nomenclature of Bacteria, the valid publication of *Staphylococcus succinus* subsp. *casei* automatically creates another subspecies, *Staphylococcus succinus* subsp. *succinus* Lambert *et al.* 1998.

|| Designated as the type strain (in the effective publication 'deposited strain') and culture collection accession numbers provided on request for validation.

^{*}Priority number assigned according to the date the documentation and request for validation are received.
